CONVECTION OVEN TECHNOLOGY

Balanced turbulent heat distribution is essential when baking, roasting, and dehydrating food. The American Range convection oven technology features a convection motor and fan to enhance uniform heat distribution throughout the large oven cavity.

The strategic placement of the convection fan ensures consistent heat distribution even when challenged with cooking the largest turkey, ham or roast.

CONVECTION OVEN IS GREEN TECHNOLOGY

The efficient design of the convection oven uses less gas than a standard oven.

Customize with RAL® for the best color that suits your lifestyle.
